1) Introduction

The Chosen Blob is the main protagonist and the character you play as in the game.

He attacks by swinging his sword.

His appearance can be customized, but his on basic appearance, he wears a blue tied cape and wield an iron sword, which looks damaged and chipped.

Blobs or Heroes are characters in the game where you can recruit and upgrade them to fight with you.

There are 3 types of blobs, Melee, Ranged, and Spell.

After the blob has reached certain levels, you can unlock a skill for coins. The skill must be unlocked before you can level up that blob again. The types actually have no difference, but there's some boost that are only affect one type of blobs.

2) Leveling Multiplier

While leveling there are various break points where the Chosen Blob will have a big increase in damage, however the Chosen Blob gets to high levels these break points both decrease in how often they occur, and increase in their average multiplier.

From levels 1 to 1,000 every 20 levels (except for at level 370 where it happens after 30 levels) starting from level 10 the Chosen Blob will experience one of these spikes in damage. The multipliers range from x2 to x10 in this range.

From levels 1,001 to 2,000 every 40 levels the Chosen Blob will experience their damage spike, and these multipliers range from x2 to x10.

From levels 2,001 to 4,000 every 50 levels the Chosen Blob will experience a damage spike, with their multipliers ranging from x2 to x50.

From levels 4,001 to 10,000 every 100 levels the Chosen Blob will experience a damage spike, with their multipliers ranging from x10 to x100.

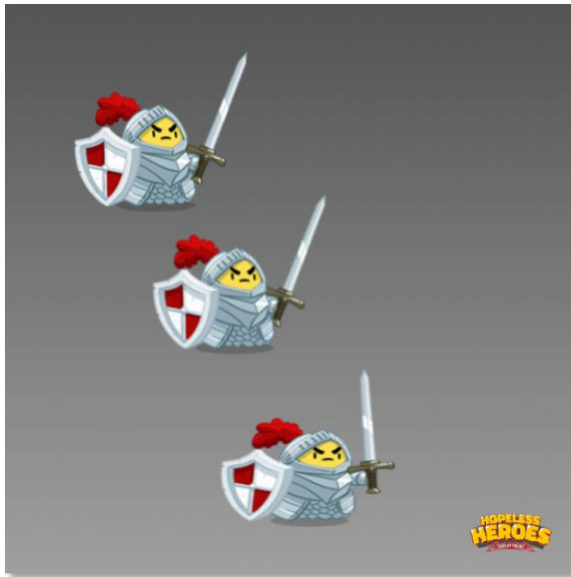

From levels 10,001 to 20,000 every 200 levels the Chosen Blob will experience a damage spike, with their multipliers ranging from x20 to x1,000.

Name	Description
All Damage	x1.1 All Damage
All Blob Heroes Damage	x1.1-1.2 All Blobs Damage
All Melee Damage	x1.1 All Melee Blob Damage
